

TTNET WiFi Abroad/iPass Service

User Manuel for iOS Devices

Download Process

Step 1

Find the app by searching iPass Open Mobile in the App Store.

Step 2

Select 'INSTALL'

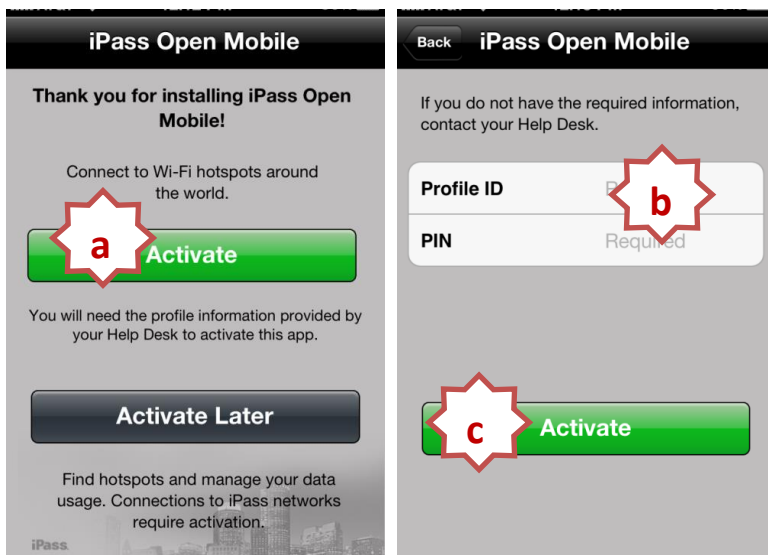

Activation Process

Step 3

Open the app and activate it by inputting your credentials (for first time usage only).

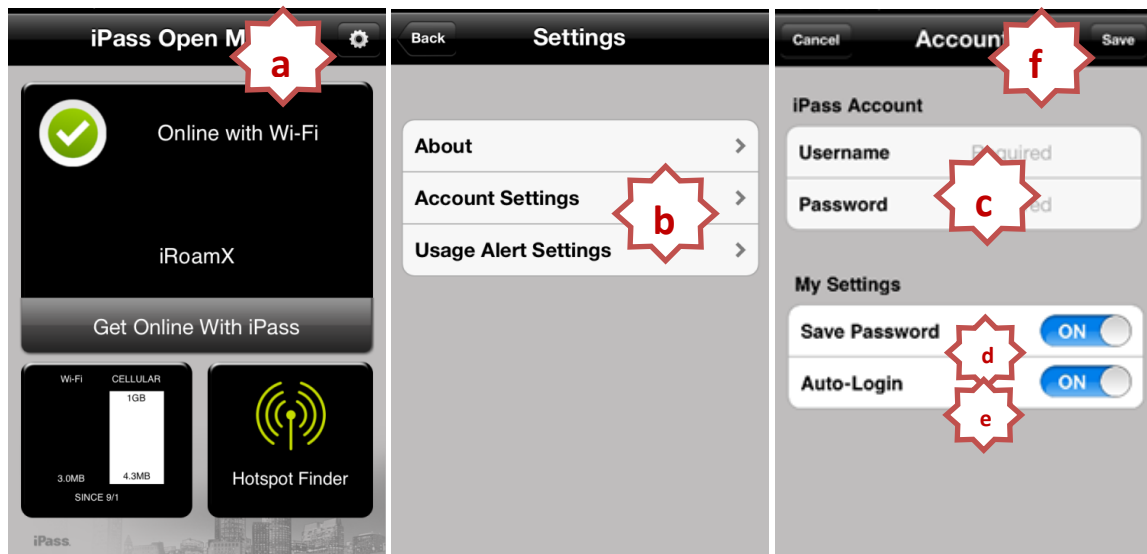

- a) Select 'Activate'
- b) Input 'Profile ID' as **20072**.
PIN: Leave this field blank
- c) Select 'Activate'

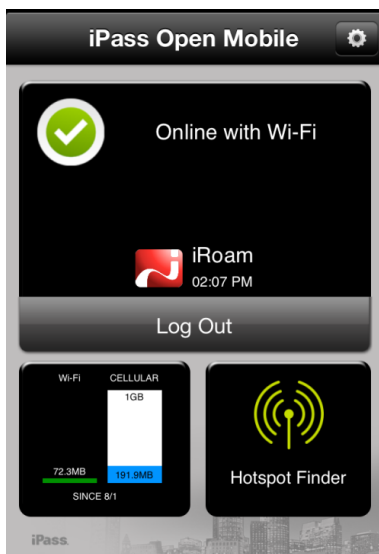

Step 4

- a) Select 'Settings' (top right-hand button)
- b) Select 'Account Settings'
- c) Input your **ADSL Username** and **Password** (Username and Password is case sensitive)
- d) Turn on 'Save Password' to save your password

- e) Turn on 'Auto-Login' in order to auto-connect to preferred Wi-Fi networks (if this feature is disabled by your service provider, it will not appear below)
- f) Select 'Save' to save your account settings

Your client has now been activated and you are ready to connect to eligible hotspots.

Step 5

- a) Go into 'Settings' on your smartphone and select 'Wi-Fi'
- b) Turn on the Wi-Fi function of your smartphone and select an eligible Wi-Fi hotspot name (SSID).
